# Welcome to our app

This document is there to help you navigate through this application.

You will find at the top of the page this bar with different tabs, it is via these tabs that you will discover our application.

In the 1st tab you will find an introduction highlighting in particular the data we have used. It is also possible to choose whether you want the application to be in English or French via 2 sub-tabs, located under the main tabs.

In the 2nd tab, use of the system, a brief explanation of the SVM (Support Vector Machine) will be provided.

The 3rd tab is there to define the different tools we have put in place to show the effectiveness of our models as well as to compare the models we have put in competition.

In the Case study tab, you will find on the side of the screen what type of SVM you want to test. You can apply different settings and see what the differences are, how it will change the effectiveness of the model you have defined.

The following tab is our model comparator. You can choose which model you want to compare to the SVM. Every models used here are the ones that gives us the best result. A conclusion is also available on this page.
